INFINITY2-1R - Pink in Support of Breast Cancer Research

For each and every INFINITY2-1R sold Lumenera donates \$20 in support of Breast Cancer Research. Contributions will not be capped.

INFINITY2-1R

The reengineered INFINITY2-1R scientific camera offers a significant performance increase for quantitative and low-light applications over its predecessor. Improved thermal management, combined with a much higher dynamic range and 14-bit output have resulted in a versatile entry-level research camera. The INFINITY2-1R easily manages seconds of exposure time with a dark current rating of less than 1 e-/s.

Superior Sensitivity

The INFINITY2-1R has a dynamic range of 64 dB allowing users to image unevenly lit samples. The resulting images show detail in bright and dark areas not normally seen in lower dynamic range cameras. Advanced thermal management allows for long exposure times of several minutes with results comparable to much higher priced cooled cameras.

Full Image Analysis Software Included

INFINITY CAPTURE, an intuitive image capture program, and INFINITY ANALYZE, a full image analysis package offering; camera control, measurement, annotation, tiling and post capture enhancement, are both included. Camera and software combine to create a complete microscopy imaging solution.

USB 2.0 Plug-and-Play Interface

Installation of one or more cameras on a single computer is quick and simple through a high-speed USB 2.0 interface.

Third-Party Software Integration

INFINITY cameras are integrated into a variety of third-party software packages through direct drivers or with TWAIN/DirectX support.

Mac Camera Software

A Mac camera driver and ImageJ plug-in are available. Please refer to the Lumenera web site at www.lumenera.com for up-to-date details.

Superior Technical Assistance Center (TAC)

Access to TAC and the knowledge base are included, providing full support for cameras, software and microscopy applications.
